- Self adhesive silicone base pad
- Manufactured and tested to comply with EC safety regulations. CE labelled
- 12 month warranty on machine and heat element
- Full service/ spares support
- Manual supplied illustrates electrical wiring diagram, control unit operation, exploded diagram and parts list
- Full safety instructions

Machine Info:

The Studio Auto Clam 406 is built to a high standard and features a laser cut frame for added strength. The control box features a large touch pad LCD display for setting your required time and temperature, an illustrated on/ off switch, machine fuses and a prominent emergency stop button, for added safety in operation. The controller has a built in error reporting function that displays an error code message in the event of a fault in either the heating element or control system.

The clam action means this press requires minimum operating space and the auto-open function means that at the end of the countdown timer the heat press automatically opens, stopping the transfer process. Pressure adjustment is made manually via an easy to operate pressure adjustment wheel.
