

STUDIO TWIN TABLE PNEUMATIC

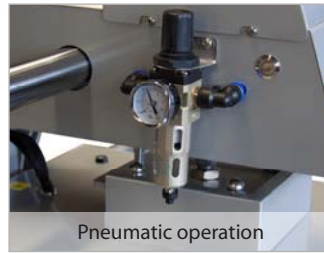

A dual headed press with auto-release head

Digital controller

Auto release head

Pneumatic operation

Dual table operation

Features:

- Supplied tables: (x2) 38 cm x 50 cm (15 in x 19.5 in)
- Fully adjustable and accurate air pressure gauge control
- Locking air pressure control
- Emergency stop button
- Heat plates will not operate until directly over table
- Silicone base pads
- Minimal space requirement
- Manufactured and tested to comply with EC safety regulations. CE labelled
- 12 month warranty on machine, lifetime warranty on heating element
- Full service/ spares support.
- Manual supplied illustrates electrical wiring diagrams, exploded diagram and parts list. Full safety instructions

Machine Info:

The Studio Twin Table Pneumatic press is a pneumatically operated double-headed heat press for transfer printing and material fusing. It is ideal for high volume production with low operator fatigue. The dual table operation enables the operator to load one table while the other is in the transfer position.

Safety features control the use of the machine, both operating buttons have to be pressed simultaneously to lower the heat plate and magnets are fitted at either side of the slide bar to help 'lock' the head in place. The heat plate will not operate unless it is aligned directly over the lower table and an emergency stop button gives peace-of-mind.

Time and temperature can be controlled by the microprocessor controller, which allows automatic opening when the set time is reached.

Additional Tables:

- 15.2 cm x 15.2 cm (6 in x 6 in)
- 20.3 cm x 20.3 cm (8 in x 8 in)
- 25.4 cm x 25.4 cm (10 in x 10 in)
- 30.48 cm x 15.2 cm (12 in x 6 in)
